BA, BAA & BABA
COMPLIANT PRODUCTS

For over 30 years, QTL has been designing and manufacturing architectural lighting in the United States. From federal infrastructure to local transit, projects across the country rely on QTL's USA-made lighting solutions to meet BAA, BABA, or BA requirements. With integrated manufacturing in Connecticut, we maintain full control over materials, processes, and output – ensuring our products meet the highest standards while supporting American jobs and infrastructure.
