DIRECT BURIAL

Q-SET

For the first time, a power supply has received not one but three NRTL listings: landscape lighting systems, pool and spa lighting system, and low voltage lighting systems. All Q-SETs are fully potted for additional environmental protection and designed to work with our IP68 rated Q-VAULT-5.

Q-VAULT

The only IP68 watertight direct burial power supply unit on the market. This product won the 2008 LFI design excellence award for best product design. It has also survived material disasters including floods, hurricanes, and wild fires, continuing to operate as designed even after being completely submersed in water.

Q-HEX & Q-TRIX

Q-HEX power supplies are specifically designed to fit into our Q-TRIX direct burial enclosures. Q-TRIX is the perfect solution for compact direct burial power supply applications, underground junction/splice boxes, or as a mounting stake for landscape lighting fixtures.

ACCESSORIES

Q-CLIK & INSERTS

For a secure water-tight seal, QTL developed custom threaded fittings which fit in different knockout sections of our direct burial housing systems.

Q-WIRE

Q-Wire is UF-B, 2 conductor, marine grade, Class 1, NEC-Chapter 3; therefore, it is rated to be placed outdoors, underground or in walls of a single dwelling, residential building.
